

Data Shadows Film Screening

Join us for a bring-your-own-lunch screening of the art movie Data Shadows, exploring Sabina Leonelli's concept of 'data shadows' which refers to concerns when examining data that is missing, unavailable, or invisible. The notion of data shadows forces us to rethink what is typically recognized as knowledge or dismissed as non- what is invisible, tacit, ignored, denied, expected, forbidden, private, inaccessible, unknown, or unexplored.

After the film, we will discuss how such data shadows can be applied to our own data contexts.

Date & time	Place
21 May, kl. 12.15-13.00	TemCas, Campus Valla
