

# Openness, Inequity, and Injust

Rena Alcalay and Paola Castaño

*Towards A Philosophy of Open Scientific Practices: Comparing Research  
Environments*

***PHIL\_OS Conference  
April 28, 2025***

# Conceptualizing Openness, inequity and injustice

1

Acknowledgement of the diversity of research environments around the world - Different ways in which OS infrastructures fit everyday research work in low-resourced settings.

2

Challenge assumptions about the technologies, skills and forms of knowledge that are required to produce reliable research.

3

Contribute a vocabulary to address existing disparities in method, resources and perception of the significance of scientific work.

# Two key concepts

Low-resourced setting

Epistemic Harm

# Low-Resourced Settings

- Growing body of evidence about different dimensions of inequities in OS (Bezuidenhout et al. 2017, Fell 2019, Ross-Hellauer 2022, Shanahan and Bezuidenhout 2022, Leonelli 2022, Cole et al 2024, Bezuidenhout 2025).
- Malleable normative concepts: “equity”, “justice”, “openness”.
- Commensuration efforts - standardized ways of constructing proxies for elusive qualities (Espeland and Stevens, 1998) – to measure them.
- “Low-resourced” is not unidimensional or dichotomous (low/high), and resources are diverse.
- Gaps are unbridgeable and there is no centralized instance of resource allocation when it comes to OS research globally.
- Focus on processes of redistribution.

Yinka Shonibare, “Earth Kid”, 2020

# Case of Redistribution

PHIL\_OS Conference April 28, 2025

- Paper: “More than a NASA Badge: MetaDocencia and Capacity Building for Open Science Communities in Latin America.”
- Instance of redistribution: training resource developed in/for the US NASA context in 2022 and adapted to Latin American contexts.
  - ✓ Funded by NASA through a fiscal partner
  - ✓ Materials were translated and contextualized
  - ✓ Delivered to Latin American scientists (Three cohorts with 406 participants, 210 ‘badged’, 45% with graduate degrees, 45,3% identified as being part of one or more underrepresented groups in science)
  - ✓ Connecting communities of practice + training for fund-seeking
- Latin American communities of practice: limitations of universalizing proclamations about open science + importance of shifting ownership of funding and tools.
- These communities do not automatically represent alternative epistemologies but, in their diversity, strive for better means to operate in dynamic

# Two key concepts

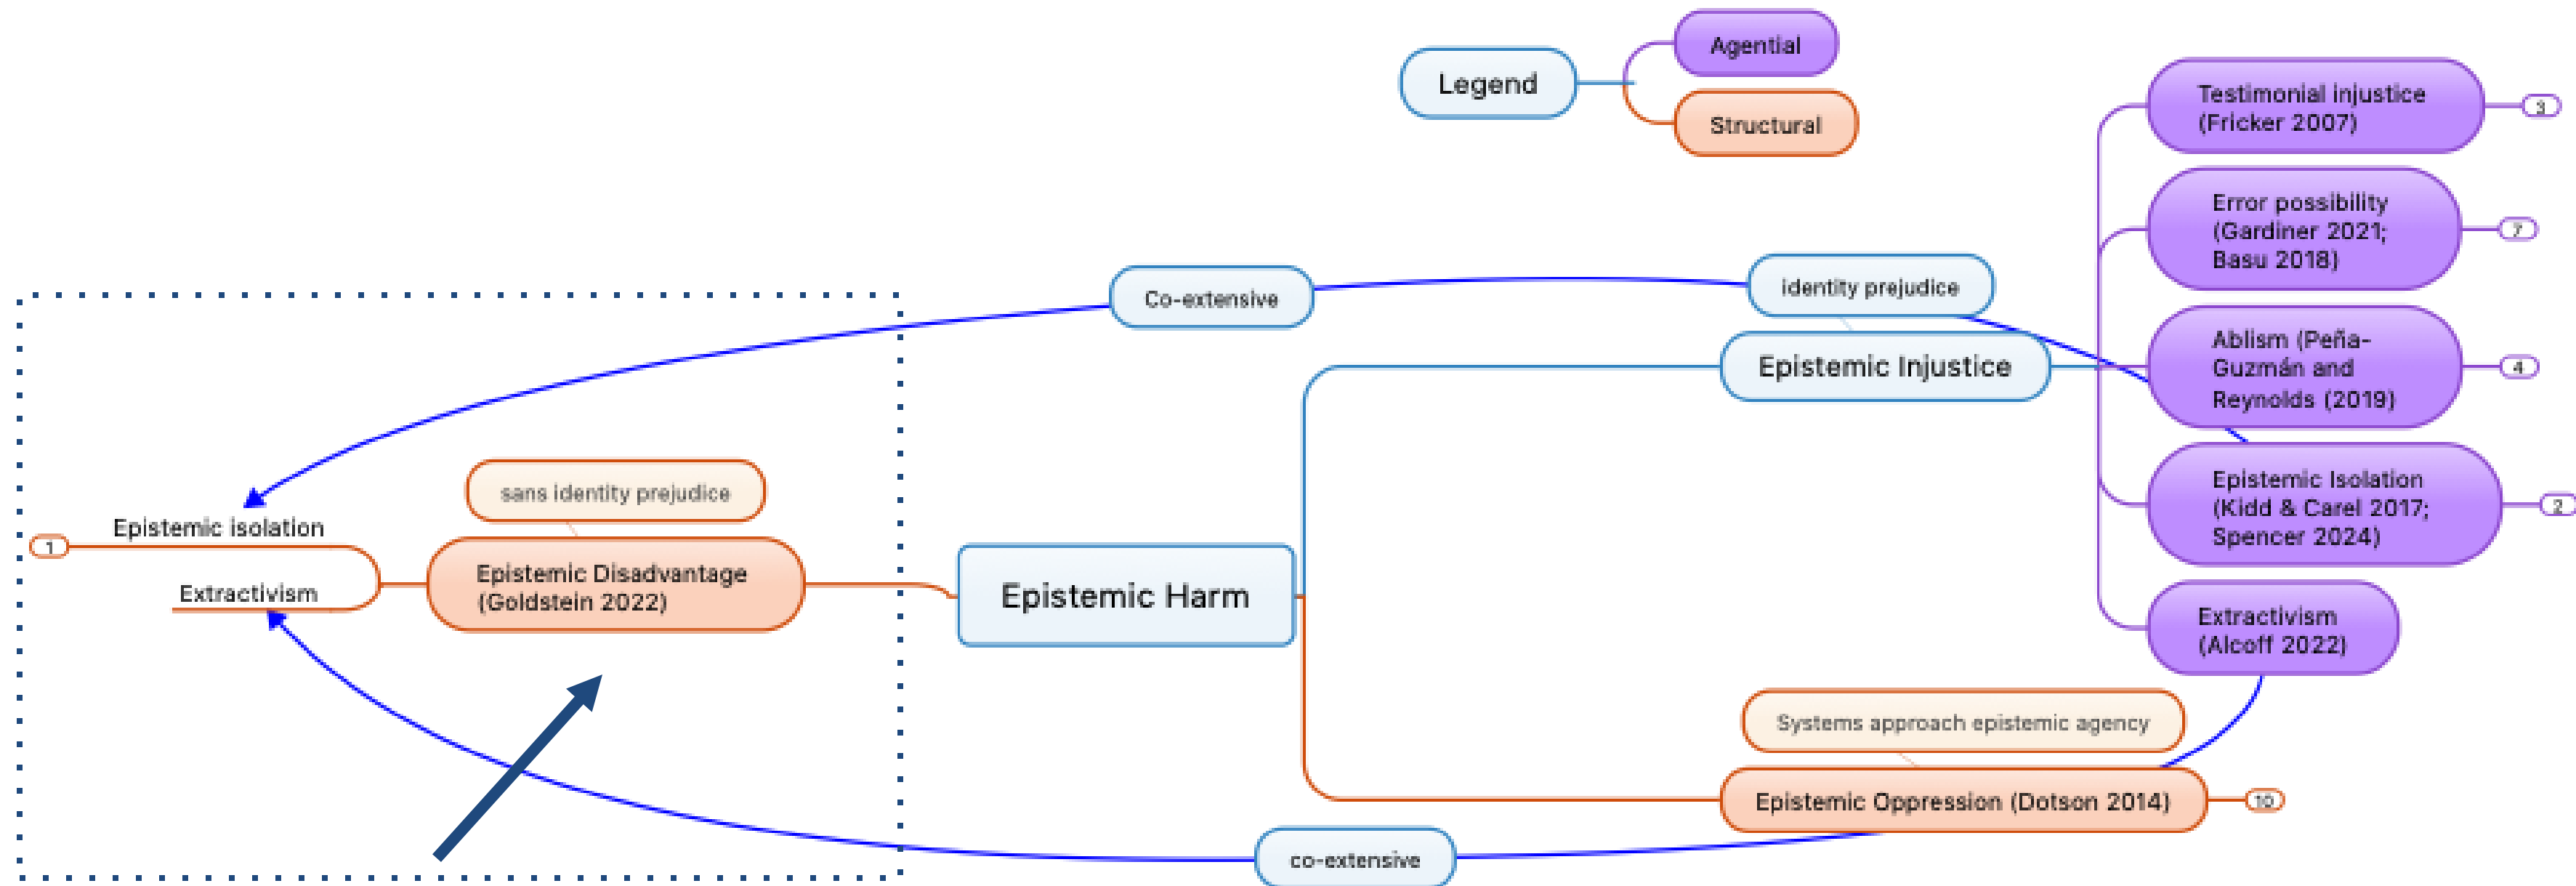

Low-resourced setting

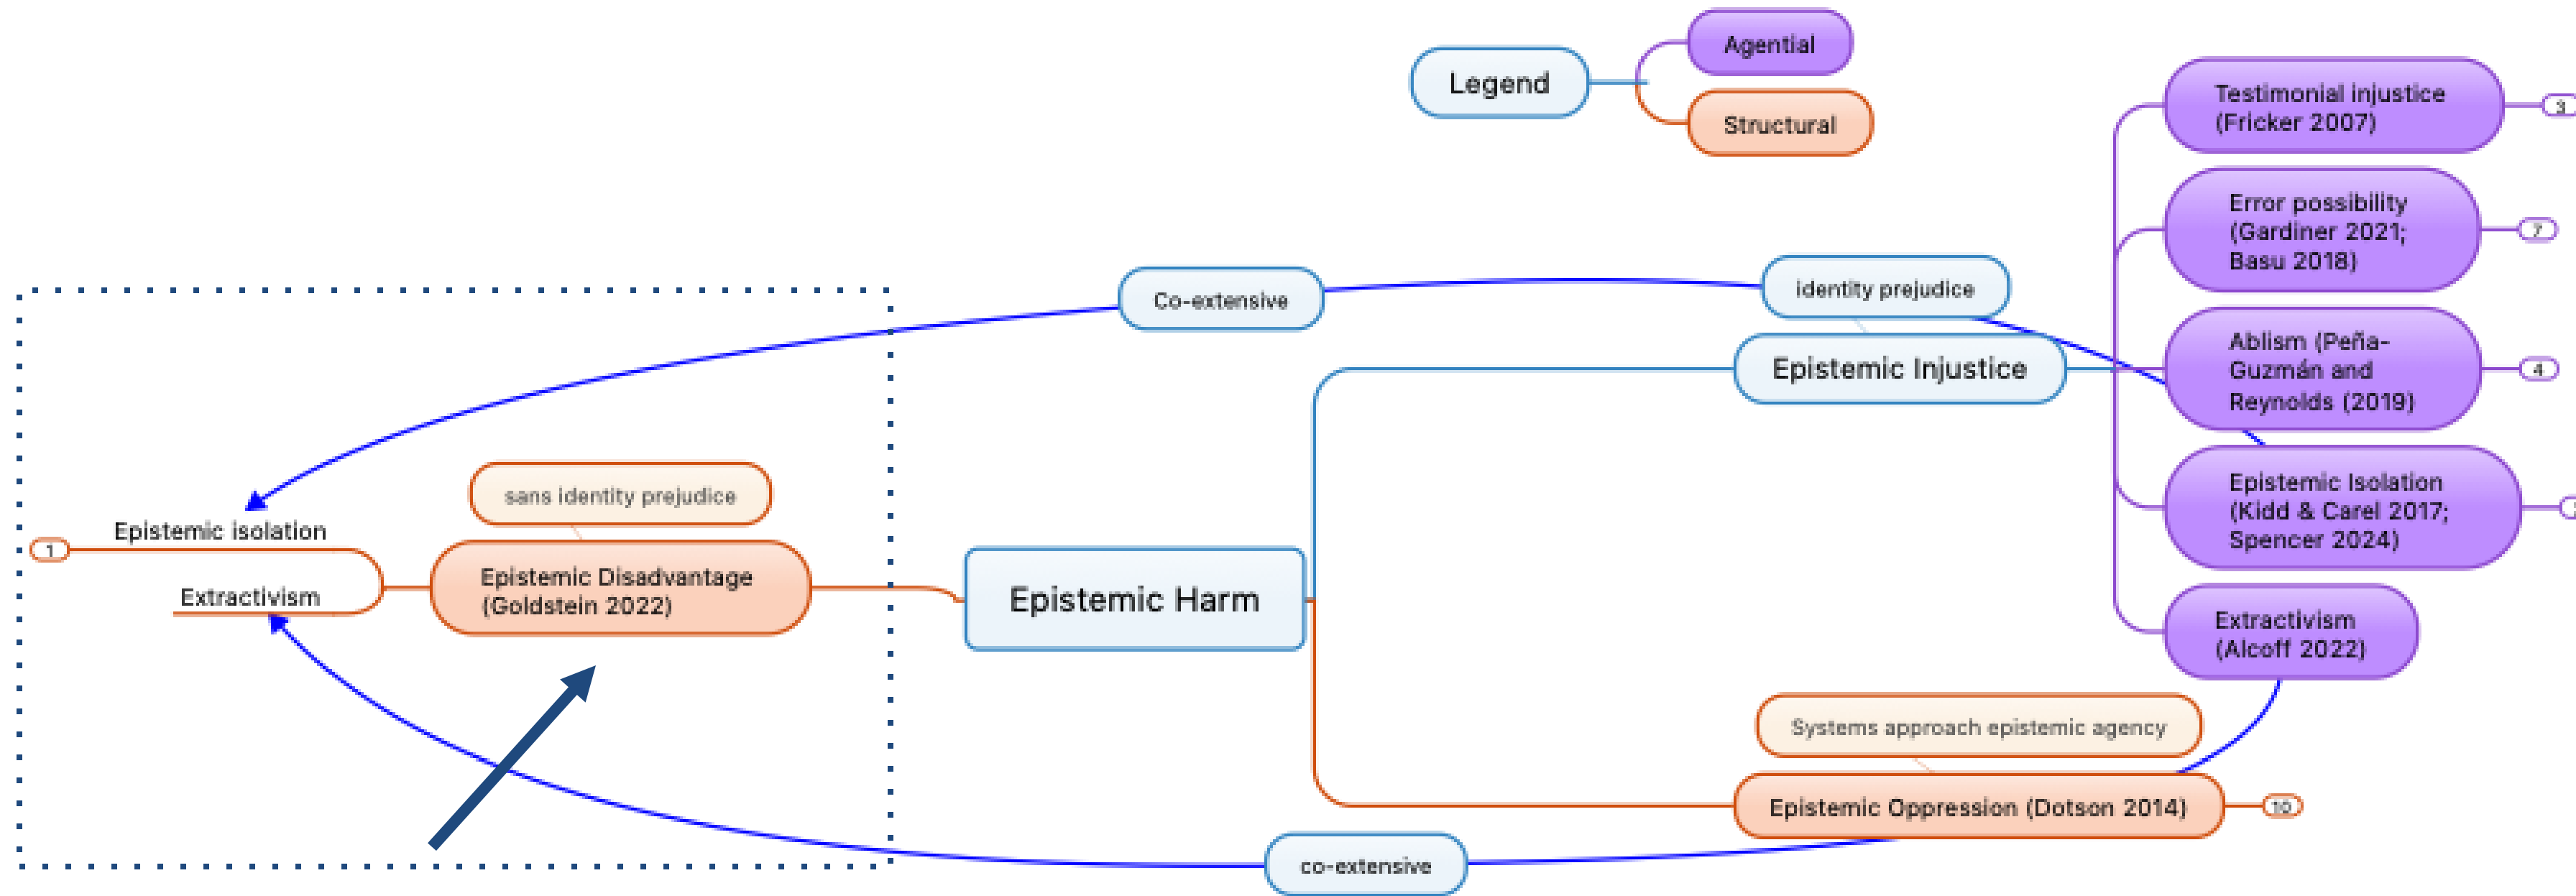

Epistemic Harm

# Epistemic Harm

# Question: In what sense are the testimonial channels and data sharing practices of open science ethically and epistemically charged?

# LIST OF CONTRIBUTORS

*More than a NASA Badge: MetaDocencia and Capacity Building for Open Science Communities in Latin America* by Laura Ación, Laura Ascenzi, Alejandra Daniela Calero, Paola Castaño, Jesica Formoso, Patricia Loto, Paz Míguez, Francisco Palm, Nicolás Palopoli, Romina Pendino, Maria Angela Petrizzo Páez, Driselda Sánchez-Aguirre, Irene Vazano, and Verónica Xhardez

*Opening Up Participation through Global Citizen Science: The Case of eBird India* by Rose Trappes

*The entrenched durability of scientific software: users and developers addressing openness* by Frédéric Wieber and Alexandre Hocquet

*An Account of Participatory Informational Format Exclusion* by Nathanael Sheehan

*Procedural Certified Amplification and Algorithmic Credibility* by Carole J. Lee

*Extractivism and Epistemic Disadvantage in Open Science Practices* by Rena Alcalay and Joachim Vandekerckhove

*Not all research environments are created equal: Structural injustice in low-resourced scientific settings and its epistemic implications* by Sabina Leonelli

Commentaries by Helen Longino and Rachel Ankeny.

# SPECIAL ISSUE

# ACKNOWLEDGMENTS

The Philosophy of Open Science for Diverse Research Environments is funded by the European Research Council (ERC) under the Horizon 2020 Research and Innovation programme [Grant Agreement 101001145].

Thank you to the MetaDocencia team for their welcoming support of this investigation and collaboration.
